

You are invited to a public consultation

Statkraft are updating our plans for Swansea Greener Grid Park located to the west of Rhydypany Rd, Morriston to make sure that the development maximises the benefits to the grid. Swansea Greener Grid Park was originally granted planning permission in 2021.

Swansea Greener Grid Park will aid the stability of the National Grid and help reduce our reliance on fossil fuel. To find out more about Swansea Greener Grid Parks visit www.statkraft.co.uk/swansea.

We are consulting the community on the plans in advance of submitting a planning application and would welcome your questions and feedback.

Public Exhibition

16 February, 3.30pm – 7:30pm

Morriston Rugby Club, Heol Gwernen, Cwmrhydyceirw,
Swansea SA6 6JS

Virtual Exhibition

16 February - 23 February

What is a Greener Grid Park?

A Greener Grid Park will help increase the amount of renewable energy that can be delivered onto the electricity grid network. Our plans would provide the same stability service as a fossil fuel plant, but in a clean, green way.

We look forward to seeing you at the consultation event. If you are unable to attend, you can find out more by visiting our website or contacting the consultation email address UKProjects@statkraft.com.
