

- Turbine Locations
- Buffers (5km intervals to 40km)
- Zone of Theoretical Visibility (hubs)
 - 1-3 turbines visible
 - 4-6 turbines visible
 - 7-9 turbines visible
 - 10-12 turbines visible

Notes: The ZTV is calculated to turbine hub heights of up to 82m from a height of 2m above ground level. The terrain model is bare ground derived from OS Terrain 50 Height data. Earth curvature and atmospheric refraction have been taken into account.
