

We're innovative and community focused

Statkraft is dedicated to engaging with communities and bringing meaningful benefits.

We would like to speak with you about how this project can bring new investment to your community. We are open to your ideas.

Community Benefit Fund

We have committed to a Community Benefit Fund that delivers £5,000 per MW installed, per year, for the operational lifetime of the project.

Shared Ownership

We are keen to offer Shared Ownership on our new development projects, if there is local interest. We would like to hear your views on enabling the community to have a financial share in Carn Fearna Wind Farm.

Local Supply Chain

We're keen to work with local businesses. We're interested in hearing from all types of local suppliers, from catering and accommodation to equipment suppliers and electrical engineers.

Meet the Project Team:

Senior Project Manager,
Scott Vallance

Project Manager,
Shannon Aitchison

Our team of specialists will be able to answer questions and provide more information throughout the exhibition. Please visit our website to find out more.

Invitation to Public Exhibition: 21 – 23 November 2023

Carn Fearna Wind Farm

We would like to introduce ourselves and our proposal for Carn Fearna Wind Farm.

Berry Burn Wind Farm, Forres in Moray. 29 turbines, 100m tip height

Carn Fearna Wind Farm is a new wind farm, proposed for an area of land 1.5km east of Garve and 7km north-west of Strathpeffer within the Highlands.

Statkraft have been present in the UK since 2006, and currently operate one wind farm in the Highlands, with three further projects in planning or consented in the region. In the UK, we also own and operate a number of Greener Grid Parks, helping to increase the capacity for renewable energy on the national grid.

We invite you to meet the project team at our public exhibitions in Tarvie, Contin, Strathpeffer or Dingwall, or to find out more about our plans online.

About Us

Statkraft is Europe's largest generator of renewable energy, with origins going back over 125 years in Norwegian hydropower. Our Scottish headquarters are in Glasgow and we have 5,700 employees across 21 countries.

Carn Fearna Wind Farm Proposal

Community engagement is very important to us.

We are committed to listening to communities to help shape and inform our proposal. The project is in the very early stages, it will be refined throughout the development process as studies are completed and feedback received.

For more information, visit:
www.carn-fearna.co.uk

11 Up to 11 wind turbines proposed

£5,000

Per MW installed per year for a Community Fund
As recommended by Scottish Government

A maximum height to blade tip:
200m

Exciting new opportunity to talk about
shared ownership

Local suppliers are encouraged to register their details with us on our website
