

## We're innovative and community focused

Statkraft is dedicated to engaging with communities and bringing meaningful benefits.

We would like to speak with you about how our project can bring new investment to your community. We are open to your ideas.

### Community Benefit Fund

We are committed to a Community Benefit Fund that delivers £5,000 per MW installed, per year, in accordance with Scottish Government guidance.

### Shared Ownership

We are open to offering Shared Ownership on our projects, if there is local interest. We would like to hear your views on enabling the community to have a financial share in the project.

### Improved Broadband

We commissioned a feasibility study into improving local broadband as part of the project and want to gauge interest for further development.

### Local Supply Chain

We want to work with local businesses to deliver our projects. Visit our project website for information on how local businesses can register their interest.

### Meet the Project Team:

Our Senior Project Manager Heather and a team of specialists will be able to answer questions and provide more information throughout the exhibition. Please visit our website to find out more.

# Invitation to Public Exhibition: 30 August – 1 September 2022

## Loch Liath Wind Farm Proposal

In 2021, we announced our interest in developing a wind farm 11km southwest of Drumnadrochit. Last summer, we exhibited the project at its early stages. Since then we have refined the design and now invite you to view our plans before they are submitted to the Scottish Government later this year.

Twentyshilling Hill Wind Farm, Dumfries and Galloway, 9 turbines, 140m tip height

We will be hosting exhibition sessions in Invermoriston, Cannich and Drumnadrochit, as well as a virtual exhibition and online chats. We look forward to meeting you and hearing your feedback on our latest proposals.

## About Us

Statkraft is Europe's largest generator of renewable energy, with origins going back 125 years in Norwegian hydro power. Our Scottish head office is in Glasgow and we have 4,800 employees across 19 countries. We have more than 20 projects in operation or in development across the UK, including the Baillie Wind Farm in Caithness, Berry Burn Wind Farm in Moray and the Keith Greener Grid Park.

# Loch Liath Wind Farm Proposal

## Project Summary:

## Community engagement is very important to us.

Since our 2021 exhibition, we have listened to feedback and carried out further environmental surveys to shape the development. The number of turbines has reduced from 26 to 13, removing the most visually prominent turbines and protecting peatland habitats.

For more information, visit:
