

- Site Boundary
- ★ Proposed Turbine Location
- Distance to turbines (5km intervals)
- Other Wind Farms
 - under construction
- Zone of Theoretical Visibility
 - both wind farms visible
 - Oliver Forest visible only
 - Whitelaw Brae visible only

Notes: The ZTVs are calculated to turbine tip heights for each wind farm from a height of 2 m above ground level. The terrain model is bare ground derived from Ordnance Survey Terrain 50 height data. Earth curvature and atmospheric refraction have been taken into account. Symbols not to scale.
