

Berry Burn Extension Wind Farm

Invitation to Public Exhibition

Berry Burn Extension Wind Farm is located south of Forres in Moray, and has been operating since 2014, consisting of 29 turbines. In 2020, Statkraft applied to extend the existing wind farm by nine turbines. In December 2021, consent was received from the Scottish Government.

Borrow pit materials will be used during the extension construction period, enabling the use of materials found on-site and significantly reducing construction traffic. As a result, a planning application is required to amend the location and size of the borrow pits originally consented.

Statkraft would like to invite residents to public consultation events for the proposed planning application. At these events, you can view our project plans and ask the Project Team questions. **We are not seeking planning permission for further turbines, beyond those already consented.**

Tuesday, 24 September 2024	Edinkillie Hall, Dunphail, Forres, IV36 2QW	3pm to 7pm
Wednesday, 30 October 2024	Dallas Village Hall Dallas, Forres, Moray IV36 2SA	3pm to 7pm

Introducing Steve Reid

Steve is Principal Project Manager for this application and will be joined by the project team to hear your feedback and answer questions.

Local Suppliers

A variety of goods and services are required through the construction period. We are happy to discuss these with attendees at our events, or companies can register at www.berryburn-extension.co.uk

Comments should be made to Statkraft UK by 13th November 2024 and do not constitute a formal representation. If a subsequent planning application is made, you will have an opportunity to make a formal representation.
